War To Be Waged On Tuberculosis Affected Cows

A war of extermination against tuberculosis in cattle will be launched in Alabama beginning February 15th, according to recent announcement by Dr. C. A. Cary, State Veterinarian. Montgomery County has been selected for the beginning of a state-wide campaign which will be kept up until every cow in the State has been tested for tuberculosis, it was announced. Infected cows will be slaughtered,

At Planting Time (for one acre) 50 to 100 lbs. Chilean Nitrate of Soda. 25 to 75 lbs. muriate of potash. 300 to 400 lbs. superphosphate. This gives you enough phosphate and potash; the Chilean Nitrate gives the crop the best pos-sible start and encourages maximum growth 30 to 40 Days After Planting (for one acre)

150 to 200 lbs. Chilean Nitrate of Soda sidedressing.
This gives the crop greater vigor and resistance to pests and disease; makes bigger bolls and carries more of them through to earlier maturity; increases yields and improves quality. That's all there is to it! The important part of the recipe is the nitrogen. Chilean Nitrate can make a good fertilizer out of a poor one; will make a good fertilizer better. A little Chilean Nitrate at planting time and plenty of it later as side-dressing just about takes the gamble out of cotten farming.

If you cannot find out whether your planting-time fertilizer contains Chilean Nitrate; the way to make sure is to buy fertilizer low in nitrogen and mix Chilean Nitrate with it at the rate of 200 to 400 lbs. per ton. In this way you are certain of enough of the best nitrogen under your crop.

Special FREE Book Our new illustrated book "How to Fertilize Your Crops" gives full instructions. Free. Ask for book No. 1 or tear out this ad and mail it with your

HOW FORD NETHODS CUT COST OF DISTRIBUTION

Laxative Powder out some record of its business. enterprises more profitable.

Lower profits in selling save you at least \$50 to \$75 in addition to the many savings in manufacturing

WENTY-SEVEN years ago the Ford Motor Company was formed to provide reliable, economical transportation for all the people. That original purpose has never changed. The constant effort in every activity is to find ways to give you greater and greater value without extra cost-frequently at lowered cost. This applies to distribution and similar important factors, as well as manufacture.

For the Ford Motor Company believes that its full duty is not only to make a good automobile at the lowest possible price, but to see that there is no waste, extravagance, or undue profit in any transaction from the time the car leaves the factory until it is delivered to your home. It is obvious that hard-won savings in production will be of little value if they are sacrificed later through excessive selling costs.

EVERY purchaser of a motor car has the right to know how much of the money he pays is for the car itself and how much is taken up by dealer charges. If these charges are too high, one of two things must happen. Either the price of the car must be raised or the quality lowered. There is no other way. The money must come from somewhere.

In the case of the Ford, the low charges for distribution, selling, financing and accessories mean a direct saving of at least \$50 to \$75 to every purchaser in addition to the still greater savings made possible by economies in manufacturing. Ford charges are not marked up or increased to cover a high trade-in allowance on a used car.

The profit margin on the Ford car has always

been fair to both the dealer and the public. Within the past three months, it has been possible to effect still further economies. Today, the discount or commission of the Ford dealer is the lowest of any automobile dealer. The difference, ranging from 25% to nearly 50%, comes right off the price you pay for the car.

THE business of the Ford dealer is good because he makes a small profit on a large number of sales instead of a large profit on fewer sales. He knows, too, that the extra dollar-for-dollar value of the car makes it easier to sell and more certain to give satisfactory service after purchase.

Consider also that the Ford car is delivered to the purchaser equipped with a Triplex shatter-proof glass windshield, an extra steel-spoke wheel, and bright, enduring Rustless Steel for many exterior metal parts, in addition to four Houdaille double-acting hydraulic shock absorbers and fully enclosed four-

If for any reason you wish to buy certain small accessories, you will find that these, too, are sold at the usual Ford low prices. Replacement parts are also available at low prices through Ford dealers in every section of the country.

THESE are important points to remember in considering the purchase of a motor car. They show why it is possible to put so much extra quality into the new Ford and still maintain the low price. They are also the reasons why more than 35% of all cars sold today are Model A Fords.
